SUMMARY

Thanks for reading my CV. I am currently an undergraduate student pursuing a major in bioengineering at Marine College, Shandong University. Prior to this, I pursued studies in chemical engineering at Dalian University of Technology from 2019 to 2021. From 2022 to 2023, I have been selected to participate in the double degree experimental class of International Politics + International Economics and Trade at School of Northeast Asia Studies, Shandong University. During this period, I have actively engaged in policy-related economic research at Institute of International Studies, Shandong University as a researcher assistant, under the supervisor of outstanding postdoctoral fellow Dr. Jamal Khan and distinguished Professor Yuan Li. Additionally, I am a member of Climate Change Economics and Low Carbon Transition team at University College London(under the supervision of Prof. Zhifu Mi), Chinese Society of Optimization, Overall Planning and Economical Mathematics as well as Beijing Society of Image and Graphics. For any inquiries, Please feel free to contact me via email.

Community Leader on Secondment

Weihai, China

Assisted in various community activities, including after-school tutoring for elementary students, daycare services, and science popularization efforts. Additionally, provided education on emergency first aid techniques, such as CPR and the Heimlich maneuver, and raised awareness about the prevention and treatment of AIDS and tuberculosis. This role was part of a university social practice program organized by Shandong University (Weihai) to promote communication and interaction between university students and the community, and to address real-world social issues.

•The Bartlett School of Sustainable Construction, UCL

2024-

Research Assistant, Supervisor: Prof. Zhifu Mi, Dr. Haoran Zhang

Online Project

Conducted research under the Climate Change Economics and Low Carbon Transition team at University College London, dedicated to promoting fair and effective climate policies. Primarily focused on economic analyses of climate change mitigation and adaptation, exploring the relationship between economic activities and greenhouse gases at global, national, and urban levels. The research aligns with United Nations Sustainable Development Goals 13 "Climate Action" and Goal 11 "Sustainable Cities and Communities." Key research themes include carbon emissions accounting, comprehensive climate change assessment models, emissions-health-economic coupling, urban low-carbon transitions, negative carbon technologies such as CCUS, and the sharing economy.
